

AF2.MS6: Use cycle logistics for deliveries

Implementation effort: 

Costs: € € €

Acceptance: 

Description:

Cycle-based logistics companies offer a reliable, fast, cost-effective and environmentally-friendly way to deliver your goods on (electric) cargo bikes to your customers.

- Delivery within the country in combination with public rail service
- Transport of larger deliveries is also possible

© cyclogistics.eu | M. C. Andersen

Tips for implementation:

- Gather information about services and tariffs of local cycle-based logistics companies and bicycle based deliveries, respectively
- Establish internal guidelines stipulating that bicycle delivery companies should be used for the transport of light goods on short trips

Save time and money by:

- Cooperate with local providers
