

Field of Action 4.3: Infrastructure – Changing Facilities, Showers

AF4.MS10: Changing facilities

Implementation effort: 

Costs: € € €

Acceptance: 

Description:

Depending on the time of the year cyclists need special clothing and possibly need to change into different cloths before they start work.

To improve conditions for cyclists and to increase the attractiveness of cycling, changing rooms should be installed on the company premises.

Ideally these should contain lockers where rain gear and bicycle clothing or other equipment (e.g. helmets or back packs) can be stored securely.

© Schmidt Möbel

Tips for implementation:

- Install changing rooms as close to the bicycle parking area as possible
- Locate changing rooms in any room on the premises
- Provide a washing machine, a dryer and/or a drying room

Save time and money by:

- Establish a staff member responsible for handing out the keys for room and lockers
